

Enterprise Cloud Migration Roadmap 2025

1. Migration Phases

Phase 1 encompasses core data warehouse and analytics workloads, transitioning 120 Terabytes to Google BigQuery.

Phase 2 transitions containerized microservices to Google Kubernetes Engine (GKE) across multi-zone clusters.

Cloud Cost Optimization & Targets

2. Financial Objectives

Total on-premises data center decommissioning will yield projected annual cost reductions of \$3.8 million.

Cloud FinOps policies require automated shutdown of non-production environments between 20:00 and 06:00.
