

Pharmaceutical Research & Drug Discovery Pipeline

1. Lead Candidate Overview

Candidate molecule AX-880 targeting autoimmune arthritis completed Phase II trials with ACR50 response in 64% of patients.

Candidate NX-104 targeting neurodegenerative tau aggregates advanced to Phase I safety trials.

Patent Portfolio & Exclusivity

2. Intellectual Property

The composition of matter patent for AX-880 extends market exclusivity through November 2038.

Total active patent families within the therapeutic portfolio stands at 42.
